Solving Brake Lockup on Honda/Acura Boosters Acura and Honda power brake boosters and master cylinders. Brake lockup occurs after changing power brake booster or master cylinder. Pedal push rod-to-master cylinder piston clearance incorrect. Because of original manufacturer variations, the adjustment between the booster pedal rod and master cylinder

Solving Brake Lockup on Honda/Acura Boosters

1994 Acura Vigor with both Brake and ABS light on. What would cause this? I have not heard any squealing or grinding in the brakes and don't know what would cause this. Diagnostics at the Auto store was unable to read any ABS issues. Would like to know what would cause both lights to stay on constantly.

Acura Vigor Brake Disc - Guaranteed Genuine Acura Parts

Like some has said, the Vigor's tailight system has 4 bulbs on the bottom, and then another one at the rear windshield. If the BRAKE LAMP light comes on ONLY after depressing the brake pedal, then you most likely have a burnt filament in one or more of the bulbs. If not, then try checking the lights at night with parking lights on.
