Recap: Tuning Carburetors Shoot for WOT air/fuel ratios between 12.5:1 to 13.0:1. Best place to start improving highway and in-town fuel mileage is with the idle circuit.

### How to Tune Your Carb Like a Pro - Carb Tuning Tips

Adjusting the carburetor is a lot like tuning a guitar or other stringed instrument. You want to turn the screws equally, smoothly, and slowly until you find the sweet spot. Regardless of whether or not the engine is running too rich or too lean, bring it down to a very lean mixture by turning both screws a quarter-turn at a time, counter-clockwise, then slowly bringing them back up to an equal and smooth mixture. [4]

### How to Adjust a Carburetor: 10 Steps (with Pictures) - wikiHow

Keihin carburetors are only legal in California for racing vehicles, which may never be driven on public highways or waterways. Keihin carburetors are designed to be used with normal pump gasoline. Fuels that contain over 10% alcohol content may damage parts in the carburetors. This may prevent the carburetor from functioning properly.

### Carburetor Tuning | Keihin North America

Turn the screw in, in 1/16 turn increments, until it just starts to stumble slightly, then back off about 1/16 turn until it idles smoothly. Then set fast and curb idles." The carburetor in some of these photos is not correct for the car and has been replaced by a NOS Holley 1945.
