Be sure to check out the Featured Books section, which highlights free books that the Wikibooks community at large believes to be “the best of what Wikibooks has to offer, and should inspire people to improve the quality of other books.”

Four Years With The Iron

How much iron does your child need? Ages 1 to 3 years: 7 milligrams (mg) per day. Ages 4 to 8 years: 10 mg daily. If your child eats a vegetarian diet, aim for twice as much iron because iron from nonanimal sources is harder for the body to absorb. Your child doesn't have to get enough iron every day.

Iron in your child's diet | BabyCenter

Serve iron-rich foods. When you begin serving your baby solids — typically between ages 4 months and 6 months — provide foods with added iron, such as iron-fortified baby cereal, pureed meats and pureed beans. For older children, good sources of iron include red meat, chicken, fish, beans and spinach. Don't overdo milk.
