As our body ages, gradual changes tend to occur. From the basic building blocks to the vital organs of the body, these changes are expected but can still affect our day to day routine. As we go through the normal process of aging, we often notice a decrease in our appetite. Food becomes less appealing to older adults because of the decreased sense of taste and smell.

### GeriatricNursing.org | Basic Skills for Gerontological Nursing

Definition and Description. Gerontological nursing is an evidence-based nursing specialty practice that addresses the unique physiological, psychosocial, developmental, economic, cultural, and spiritual needs related to the process of aging and care of older adults. Gerontological nurses collaborate with older adults and their significant others to promote autonomy, wellness, optimal functioning, comfort, and quality of life from healthy aging to end of life.
