In recent years, many security experts have called for major elections to have a physical paper trail as a backup to electronic records so a trustworthy audit can be performed. This quest for stronger voter security and traceability is driving a second look at paper as part of voting election system upgrades.

### A paper trail can help protect the sanctity of voting in U ...

No electronic voting system shall be used in any election unless it generates a paper ballot or voter-verifiable paper audit trail that may be inspected and corrected by the voter before the vote is cast, and unless every paper ballot or voter-verifiable paper audit trail is retained as the definitive record of the vote cast.

### Voting System Paper Trail Requirements

A paper trail documents processes and procedures so that anyone can recreate them or finish them when incomplete. A paper trail provides proof of transactions - that they were conducted and exactly how they were conducted. Documentation is also important for billing purposes and audits, and in some cases, it's mandated by law.

An accessible audit trail - In the event compliance issues are raised—say, an employee files a labor lawsuit—employers with digital time-tracking systems can immediately access their records in preparation of their defense. Assuming paper time sheets are even kept on file, the gathering of records may represent a massive undertaking. In addition, digital records have immediate ...

### Benefits of a Digital Paper Trail - EPAY Systems

You can't really read two articles about distributed systems today without someone mentioning the Paxos algorithm. Google use it in Chubby, Yahoo used something a bit like it (but not the same!) in ZooKeeper and it seems that it's considered the ne plus ultra of consensus algorithms. It also comes with a reputation as being fantastically difficult to understand - a subtle, complex ...
