### Algebra With Solution

Step 1:: A problem involving work can be solved using the formula  $\frac{1}{T} = \frac{1}{A} + \frac{1}{B}$ , where  $T$  = time working together,  $A$  = the time for person A working alone, and  $B$  = the time for person B working alone.: Step 2:: Solve the equation created in the first step. This can be done by first multiplying the entire problem by the common denominator and then solving the resulting equation.
